917-361-8041 | [wjhuang0726@gmail.com](mailto:wjhuang0726@gmail.com) | [Portfolio](#)

Fast learner, self motivated individual and team player who is seeking a career in building modern and user-friendly web applications. Passionate about data driven design, experiences in designing clean applications that help people by making tasks more efficient. Building a variety of apps has opened the door for learning new technologies and has made me a stronger engineer today.

## TECHNICAL PROJECTS

### **E-Commerce: Ecom-Shop** - [Github](#) | [Demo](#) (login: [wei@gmail.com](mailto:wei@gmail.com), password: 1234)

*A E-commerce platform that allows users to search with speech to text and purchase products of their need.*

- + Implemented front-end architecture using React-Redux and react router for a flexible single-page application.
- + Integrated client-side requests and server responses using REST APIs and ensured logical data flow.
- + Used PostgreSQL for persistent data storage and flexible data model.

*Tools/Tech : HTML5, CSS3, JavaScript, Bootstrap, React/Redux, Heroku, PostgreSQL, Ruby, Rails, Ebay API, Speech-Recognition, Stripe API, Action-mailer*

### **Blog Application: YelpCamp** - [Github](#) | [Demo](#) (login: [wei@gmail.com](mailto:wei@gmail.com), password: 1234)

*A website that allows users to share their camping experience with others and leave comments.*

- + Developed a yelp-like application on the MERN stack. The front-end is developed using HTML, CSS, JS and back-end used MongoDB, NodeJS.
- + Understanding the ins and outs of HTTP request -REST.
- + Implemented user authentication using Authorization.

*Tools/Tech : HTML5, CSS3, JavaScript, Bootstrap, NodeJS, NPM, ExpressJS, EJS, REST, MongoDB, Authentication, PassportJS, Authorization, Heroku, mLab, Mongoose*

### **Search Engine: MeTube** - [Github](#) | [Demo](#) (login: [wei@gmail.com](mailto:wei@gmail.com), password: 1234)

*A video-sharing website that allows users to search and watch of their favorite videos.*

- + Used Javascript, HTML and CSS in the development in front end of the application
- + Exposure to create SPA using ReactJS by using the concept of virtual dom.
- + Took part of backend data processes

*Tools/Tech : HTML5, CSS3, JavaScript, Bootstrap, React, Heroku, PostgreSQL, Ruby, Rails, Youtube API*

### **Mario-Dodge-Game** - [Github](#) | [Demo](#)

- + Implemented game leader board with Rails as the backend
- + Took part in creating character/object art and sprites
- + Tested game and resolved bugs

*Tools/Tech: Javascript, HTML, CSS, Ruby on Rails, Phaser3*

## TECHNICAL SKILLS

JavaScript, Java(Core, Swing), Ruby, C++, C#, HTML5, CSS3, React/Redux, jQuery, BootStrap 4, Node.js, SQL, Rails, Mysql, Oracle Express, MongoDB, mLab, Sqlite, PostgreSQL, Git, Eclipse, Atom, Visual Studio Code, Phaser3, Cloud9, Unity, Heroku

## EMPLOYMENT HISTORY

### **ZoneManhattan**, Bronx, NY

Office Manager, *April 2017 - October 2018*

- + Updated, maintained and managed data system
- + Managed schedules and organized office functions
- + Handled internal and external inquiries for information
